AABH

58th Annual Training Conference

Efficiency and Quality Driving Sustainability

Who is AABH

The Association for Ambulatory Behavioral Healthcare is a professional association that represents Partial Hospitalization (PHP) and Intensive Outpatient Programs (IOP) across the U.S. AABH provides Training, Advocacy and Education for members, payers and regulators with a vested interest in PHP and IOP.

Purpose of the Conference

For over 50 years, AABH has been the leader in training for PHP and IOP. PHP/IOP is a niche type of program throughout the country that represent an entire level of behavioral healthcare. Because the size of the programs are limited to meet clinical standards and the services provided are somewhat unique compared with other hospital or community-based services, members rely on AABH to keep them up to date on administrative, clinical and legislative issues that directly impact them. AABH sets the standards for these types of programs. The annual conference provides a 3-day focused opportunity for members to upskill themselves in core requirements and innovations in the field.

Who attends the Conference

The Annual Conference attendance includes primarily the managers/directors of PHP and IOP. A small number of direct line staff and C-Suite attendees are also present. With the hybrid option of the training conference, the expected attendance at the conference is 130-150 total attendees.
